GLASGOW**

# CALL FOR ABSTRACTS: Deadline 30 September 2016

## 3rd European Climate Change Adaptation Conference Our Climate Ready Future

The theme of ECCA 2017 is 'Our Climate Ready Future'. Our vision is to inspire and enable people to work together to discover and deliver positive climate adaptation solutions that can strengthen society, revitalise local economies and enhance the environment. We will bring together the people who will deliver action on the ground – from business, industry, NGOs, local government and communities – to share knowledge, ideas and experience with researchers and policymakers. Set in the cultural city of Glasgow, at the heart of a city-region that is putting climate adaptation and climate justice at the core of decision-making, ECCA 2017 offers a unique opportunity to visit innovative local adaptation projects and share experience of how climate adaptation can work in practice.

ECCA 2017 is aiming to encourage broad participation and interaction across the science, policy, business and practice communities. There will be three types of session: Practice, Science and Science-Practice, as well as a business-focused day.

We welcome submissions of abstracts for individual presentations or posters, and also proposals for complete sessions covering specific topics. Innovative session formats that maximise audience participation and discussion are encouraged.

Abstracts and session proposals should be submitted under one of the broad conference themes (see right)

ECCA 2017 will be organised by  
3 EU-funded projects:

## Cross-cutting themes

**Evidence for action:** data, climate services & communication

**Planning ahead:** delivering resilience in the face of climate uncertainty

**Business and finance:** mobilising investment in climate change adaptation and building low carbon, climate resilient economies

**Making it happen:** organisations, policy, governance, justice & ethics

**Working together:** co-production of knowledge between science, business, policy, practice and local communities

**Adaptation in practice:** case studies, monitoring, support tools and guidance

**Global challenges:** climate adaptation and the UN Sustainable Development Goals

**Whole system sustainable solutions:** acting across multiple sectors and scales

## Sectoral themes

**Urban, energy & infrastructure**

**Agriculture & forestry**

**Water security & flooding**

**Biodiversity, ecosystem services & nature-based solutions**

**Health & wellbeing**
